1. Sets, Bags, and Sequences. Elementary or "naive" set theory is used to define basic mathematical structures. A set is an arbitrary collection of elements, which may be real or imaginary, physical or abstract. In mathematics, sets are usually composed of abstract things like numbers and points, but one can also talk about sets of apples, oranges, people, or canaries.

If any one of the pods goes down, it doesn't bring the others down. The system survives, and even expects, network partitioning. There are some interesting political implications to that — for example, if you're in a country that shuts down outgoing internet to prevent access to Facebook and Twitter, your pod running locally still connects you to other people within your country, even ...

Currently, science knows of precious few methods of simulating gravity on a spacecraft.. These boil down to: using acceleration by thrusting the ship, spinning the ship (or sections of the ship) to utilize "centrifugal force", or placing a large mass under the ship (generally by landing on a planet).. Centrifugal force is the method of choice for obvious reasons.
