UNIT 1.3 Electricity. Energy output of a solar panel Photovoltaics (PV) is a method of generating electrical power by converting solar radiation into direct current electricity using semiconductors that exhibit the photovoltaic effect.

Senior Physics - Extended Experimental Investigations

Concentration in Philosophy of Physics. The Philosophy of Physics concentration is concerned with the study of the conceptual history of physics, the method of inquiry that has led to our best physical theories, and the structure and interpretation of the theories themselves. Students take courses in deductive and inductive logic, the philosophy and history of physics, and quantum mechanics.

Department of Physics and Astronomy < University of ...

Cavitation is a phenomenon in which rapid changes of pressure in a liquid lead to the formation of small vapor-filled cavities, in places where the pressure is relatively low.. When subjected to higher pressure, these cavities, called "bubbles" or "voids", collapse and can generate an intense shock wave.. Cavitation is a significant cause of wear in some engineering contexts.

Dear Reader, There are several reasons you might be seeing this page. In order to read the online edition of The Feynman Lectures on Physics, javascript must be supported by your browser and enabled. If you have visited this website previously it's possible you may have a mixture of incompatible files (.js, .css, and .html) in your browser cache.

1 Atoms in Motion - The Feynman Lectures on Physics

Notation and units. As a form of energy, heat has the unit joule (J) in the International System of Units (SI). However, in many applied fields in engineering the British thermal unit (BTU) and the calorie are often used. The standard unit for the rate of heat transferred is the watt (W), defined as one joule per second.. Use of the symbol Q for the total amount of energy transferred as heat ...
