Definition. The peroxide value is defined as the amount of peroxide oxygen per 1 kilogram of fat or oil. Traditionally this was expressed in units of milliequivalents, although if we are using SI units then the appropriate option would be in millimoles per kilogram (N.B. 1 milliequivalents = 0.5 millimole; because $1 \text{ mEq of O}_2 = 1 \text{ mmol}/2 = 0.5 \text{ mmol of O}_2$, where 2 is valence).

Peroxide value - Wikipedia

If you are waiting for some bananas to ripen, you are waiting for a chemical change. A chemical change occurs when a new substance is formed through a chemical reaction like when fruit ripens or rots.

chemical change - Dictionary Definition : Vocabulary.com

A Lewis acid is a chemical species that contains an empty orbital which is capable of accepting an electron pair from a Lewis base to form a Lewis adduct. A Lewis base, then, is any species that has a filled orbital containing an electron pair which is not involved in bonding but may form a dative bond with a Lewis acid to form a Lewis adduct. For example, NH_3 is a Lewis base, because it can ...
