A file has two key properties: a filename (usually written as one word) and a path. The path specifies the location of a file on the computer. For example, there is a file on my Windows 7 laptop with the filename project.docx in the path C:\Users\asweigart\Documents. The part of the filename after the last period is called the file's extension and tells you a file's type.

And beside Draco, Harry walked along with a smile on his face, thinking about the evolutionary origins of human intelligence. In the beginning, before people had quite understood how evolution worked, they'd gone around thinking crazy ideas like human intelligence evolved so that we could invent better tools. The reason why this was crazy was that only one person in the tribe had to invent a ...
