Crystal Violet Lab Answers

Crystal violet or gentian violet (also known as methyl violet 10B or hexamethyl pararosaniline chloride) is a triarylmethane dye used as a histological stain and in Gram's method of classifying bacteria. Crystal violet has antibacterial, antifungal, and anthelmintic properties and was formerly important as a topical antiseptic. The medical use of the dye has been largely superseded by more

A. Abalone (also known as Paua Shell in New Zealand) although not a crystal or mineral, is widely used in jewellery and has its own particular healing properties. It is a mollusc or shellfish with a beautiful, iridescent interior to its shell, which is actually created by a coating of 'nacre' or Mother of Pearl, and with a stunning range of colours.
