I've been playing with a multislope ADC design. Multislope ADC are often used in high end multimeters, and as I have a mild obsession with 8.5 digit multimeters, I wanted to try making a multislope ADC. The current design, such as it is was developed with significant input from EEVBlog users (see this thread). This post documents initial bring up and tests of the first revision of the PCB.

Main Text Introduction. Many studies have documented differences in the composition of host-associated microbial communities between healthy and disease states (Clemente et al., 2012, Karlsson et al., 2013, Knights et al., 2013). For a growing number of diseases, an altered microbiome is not just a marker of disease, but also actively contributes to pathology (Chassaing et al., 2012).
