design the equipments by taking all these parameters into account. The objective of this course is to perform analysis of all the parameters and their effect on the performance of equipments and select the optimum conditions. Course content: • Introduction to system design – Regression analysis and curve fitting – modeling of thermal

ME611 Design and Optimization of Thermal Systems

Description: Design, analysis, and optimization of thermal systems. Systems analysis applied to heat exchanger, power conversion, air conditioning, refrigeration, and heat recovery systems. Economics, equation fitting, and thermal property evaluation are integrated into the simulation and optimization of thermal system designs.
