This is the web page for the new book in control theory: Control System Design by Graham Goodwin, Stefan Graebe and Mario Salgado. On this page you can find JAVA interactive demos and other resources supporting the book.

Control System Design

HVAC (Heating, Ventilation and Air Conditioning) equipment needs a control system to regulate the operation of a heating and/or air conditioning system. Usually a sensing device is used to compare the actual state (e.g. temperature) with a target state. Then the control system draws a conclusion what action has to be taken (e.g. start the blower).

HVAC control system - Wikipedia

A distributed control system (DCS) is a platform for automated control and operation of a plant or industrial process. A DCS combines the following into a single automated system: human machine interface (HMI), logic solvers, historian, common database, alarm management, and a common engineering suite.
