Earth is the third planet from the Sun, and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth orbits around the Sun in 365.26 days, a period known as an Earth year.

CHAPTER 4 CONCLUSIONS. THREE CHAPTERS have been submitted, each giving a different type of evidence of the authenticity of the Bible. Chapter 1 dealt primarily with Genesis 1, and showed how recent developments in science prove that the account of God's formation of this universe is accurate, and that some of this evidence has come about by development in science within the last few years.

The history of Earth concerns the development of planet Earth from its formation to the present day. Nearly all branches of natural science have contributed to understanding of the main events of Earth's past, characterized by constant geological change and biological evolution.. The geological time scale (GTS), as defined by international convention, depicts the large spans of time from the ...

History of Earth - Wikipedia

Scientists believe that life on Earth began in the ocean, approximately 4 billion years ago. And in fact, it was only about 500 million years ago that life emerged from the ocean onto the land.

Human impacts prior to the Industrial Revolution are not well constrained. We investigate whether the decline in global atmospheric CO₂ concentration by 7–10 ppm in the late 1500s and early 1600s which globally lowered surface air temperatures by 0.15 °C, were generated by natural forcing or were a result of the large-scale depopulation of the Americas after European arrival, subsequent ...
