Evidence of common descent of living organisms has been discovered by scientists researching in a variety of disciplines over many decades, demonstrating that all life on Earth comes from a single ancestor. This forms an important part of the evidence on which evolutionary theory rests, demonstrates that evolution does occur, and illustrates the processes that created Earth's biodiversity.

Babylon 5 (1993–1998), created by J. Michael Straczynski, is a science fiction television epic about Babylon 5, an Earth-governed space station built to promote harmony between interstellar civilizations. It is unusual in its focus on a story arc which dominates the events through its five-year run.
