Introduction “I am two with nature.” — Woody Allen Here we are: the beginning. Well, almost the beginning. If it’s been a while since you’ve done any programming in Processing (or any math, for that matter), this introduction will get your mind back into computational thinking before we approach some of the more difficult and complex material.

The Nature of Code

6. Learning to Classify Text. Detecting patterns is a central part of Natural Language Processing. Words ending in -ed tend to be past tense verbs (Frequent use of will is indicative of news text ()). These observable patterns — word structure and word frequency — happen to correlate with particular aspects of meaning, such as tense and topic.
