Information is the resolution of uncertainty; it is that which answers the question of "what an entity is" and thus defines both its essence and nature of its characteristics. Information relates to both data and knowledge, as data is meaningful information representing values attributed to parameters, and knowledge signifies understanding of a concept.

A World Beyond Physics: The Emergence and Evolution of Life Stuart A. Kauffman Oxford University Press (2019). Among the great scientific puzzles of our time is how life emerged from inorganic matter.

The new physics needed to probe the origins of life

In Unit 2 we studied the use of Newton's second law and free-body diagrams to determine the net force and acceleration of objects. In that unit, the forces acting upon objects were always directed in one dimension. There may have been both horizontal and vertical forces acting upon objects; yet there were never individual forces that were directed both horizontally and vertically.
