THE MOVIE PHYSICS RATING SYSTEM. In the name of physics decency, to protect the minds of children everywhere, so that they may grow up in a world where they know the difference between speed and velocity, we have taken the responsibility to rate movies for their portrayal of excessively bad physics.

Newton's laws of motion are three physical laws that can be considered as the foundation for classical mechanics. They describe the relationship between a body, the forces acting on it, and its motion in response to those forces. Forces are the bread and butter of Newtonian mechanics. Though they're not always the easiest way to think about the world, everything in classical mechanics can be ...

Philosophy of science is a sub-field of philosophy concerned with the foundations, methods, and implications of science. The central questions of this study concern what qualifies as science, the reliability of scientific theories, and the ultimate purpose of science. This discipline overlaps with metaphysics, ontology, and epistemology, for example, when it explores the relationship between ...

Philosophy of language is the reasoned inquiry into the nature, origins, and usage of language. As a topic, the philosophy of language for Analytic Philosophers has been concerned with four central problems: the nature of meaning, language use, language cognition, and the relationship between language and reality. For Continental philosophers, however, the philosophy of language tends to be ...
