The number of wild animals vastly exceeds that of animals on factory farms. Therefore, animal advocates should consider focusing their efforts to raise concern about the suffering that occurs in nature. In theory, engineering more humane ecological systems might be valuable. In practice, however, it seems more effective to promote the meme of caring about wild animals to other activists ...

Earth is the third planet from the Sun, and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth orbits around the Sun in 365.26 days, a period known as an Earth year.

Technological convergence is a tendency for technologies that were originally quite unrelated to become more closely integrated and even unified as they develop and advance. The concept is roughly analogous to convergent evolution in biological systems, such that (for example) the ancestors of whales became progressively more like fish in outward form and function, despite not being fish and ...
