Join the ladybug in an exploration of rotational motion. Rotate the merry-go-round to change its angle, or choose a constant angular velocity or angular acceleration. Explore how circular motion relates to the bug's x,y position, velocity, and acceleration using vectors or graphs.

Ladybug Revolution - PhET

A new US Areal No Drought Record. ICECAP NOTE: Alarmists and eco fanatics and their comrades in the fake news media love to play ambulance chasers and play up every extreme as examples of man-induced climate gone wild.

ICECAP

4.5 The student will investigate and understand how plants and animals, including humans, in an ecosystem interact with one another and with the nonliving components in the ecosystem.

Fourth Grade Science - Suffolk City Public Schools

The sun's energy has decreased since the 1980s but the Earth keeps warming faster than before. Over the last 35 years the sun has shown a cooling trend. However global temperatures continue to increase. If the sun's energy is decreasing while the Earth is warming, then the sun can't be the main ...

Sun & climate: moving in opposite directions

The content standards presented in this chapter outline what students should know, understand, and be able to do in natural science. The content standards are a complete set of outcomes for students; they do not prescribe a curriculum. These standards were designed and developed as one component of ...

Causality (also referred to as causation, or cause and effect) is efficacy, by which one process or state, a cause, contributes to the production of another process or state, an effect, where the cause is partly responsible for the effect, and the effect is partly dependent on the cause. In general, a process has many causes, which are also said to be causal factors for it, and all lie in its ...

Causality - Wikipedia

Low tides are the receding waters between the high tides. In some places, low tide can be only a few feet, while in others the ocean can recede much farther. High and low tides both appear two times each in a 24-hour day, but since the moon rises 50 minutes later each day, the tide cycles will differ by the same 50 minutes daily.

Relationship Between Moon Phases & Tides | Sciencing

Climate Science Glossary Term Lookup. Enter a term in the search box to find its definition. Settings. Use the controls in the far right panel to increase or decrease the number of terms automatically displayed (or to completely turn that feature off).
