Final Action of Conformance with Federal Regulation: Designated Forage Fish (Shared Ecosystem Component Species), Section 111, Title 14, CCR. The state regulations establish the list of included species, define directed commercial fishing, and set vessel-based catch limits for incidental take of forage species within existing commercial fisheries. Species affected by the new regulations include round and thread herring, eulachon, lanternfish, pelagic squids and some smelts.

The Marine Mammal Protection Act (MMPA) was the first legislation to mandate an ecosystem-based approach to marine resource management. Under the MMPA, Congress directed that the primary objective of marine mammal management should be to maintain the health and stability of the marine ecosystem and, when consistent with that primary objective, to obtain and maintain optimum sustainable populations of marine mammals.

SECTION 15.4 MARINE ECOSYSTEMS Reinforcement KEY CONCEPT Marine ecosystems are global. The ocean can be divided into four major zones: • The intertidal zone is the strip of land between the high and low tide lines. • The neritic zone extends from the intertidal zone to the edge of the continental shelf; most of the ocean's biomass is found in the neritic zone.
