Lab 10 C Heart Rate and Temperature The Daphnia lab was conducted and the data that they got reported below: Heart Rate in Daphnia at Different Temperatures Reading Temperature (° C) Heart Rate (beats/min.) 1 5 108 2 10 152 3 15 211 4 20 290 1. Graph the data above. 2. Answer the analysis questions below.

**Virtual Daphnia Heart Rate - AP Lab 10 Part C - Amazon S3**

In this experiment on the crustacean, daphnia, tudents must collect data on how daphnia respond to changes in their environment. Take a sample daphnia and expose it to 1% ethanol and count the heart rate by observing the crustacean under a microscope. Open ended section allows students to explore other factors that can affect the heart rate.

**Investigation: Daphnia Heart Rate - The Biology Corner**

Students commonly test the effects of chemical agents on the heart rate of the crustacean Daphnia magna, but the procedure has never been optimized. We determined the effects of three concentrations of ethanol, nicotine, and caffeine and of a control solution on heart rate in Daphnia . Ethanol at 5%% and 10%% (v/v) reduced mean heart rate to ~50%% and ~20%% of its initial value ...

**INQUIRY & INVESTIGATION Making the Most of the Daphnia ...**

The Effects of Drugs on Daphnia Introduction Daphnia, often called water fleas, are arthropods, related to crabs, lobsters, and other crustaceans. One way that they differ from those crustaceans is that their carapace is transparent. This allows for observation of their internal organs, making it easy to observe certain life functions in Daphnia.

**The Effects of Alcohol and Caffeine on Daphnia by Erin ...**

Answer 3: "While the Daphnia lab is a tough one because we're working with live critters, it's a great opportunity for our students for just that reason. Why do we think that everything should be neat? Science is a messy business and kids need to realize that. I think it's what you can do with the data afterwards that really counts.

**AP Biology: Lab 10: Physiology of the Circulatory System ...**

This chapter provides an overview of the biology of waterfleas of the genus Daphnia. It describes basic aspects of individual physiology and nutrition, including some remarks about immunity. It summarizes the typical life cycle and development of Daphnia. The modes of reproduction and the induction of resting egg production in cyclic and obligate parthenogenetic forms are discussed.
