Economics (/ ɛ k ə ' n ɒ m i k s, i: k ə -/) is the social science that studies the production, distribution, and consumption of goods and services.. Economics focuses on the behaviour and interactions of economic agents and how economies work. Microeconomics analyzes basic elements in the economy, including individual agents and markets, their interactions, and the outcomes of interactions.

Business process reengineering (BPR) has been proposed as an effective managerial tool to deal with technological changes as well as the marketing changes in today's competitive markets, which minimizes activities costing across the processes or the entire organization by analyzing and redesigning workflow and processes inside and outside the organization.

Factors Affecting the Implementation of Business Process ...

Family economics applies economic concepts such as production, division of labor, distribution, and decision making to the study of the family. It tries to explain outcomes unique to family—such as marriage, the decision to have children, fertility, polygamy, time devoted to domestic production, and dowry payments using economic analysis.

Marginal Analysis in Economics. Marginal analysis is used in economics to measure the effect of a change in one variable on another variable. A variable could be almost anything, including supply ...

Marginal Analysis in Economics | Study.com

Economics is much broader than the study of recessions and inflation or stocks and bonds.

Economists study decision making and incentives, such as the incentives for a firm to stop polluting and how taxes create incentives for labor market and savings behavior.
