Overview: Students learn how artificial selection can be used to develop new dog breeds with characteristics that make the dogs capable of performing a desirable task. Students begin by examining canine features and their functions. They are then given a scenario that describes the type of task they need a new breed of dog to perform.

Handouts, questionnaires and other leaflets. In my 'consulting room' I have two big magazine style racks on the wall (see below). Each rack has eleven compartments, and each compartment contains 10 to 20 different A4 sheets of questionnaires, information leaflets, Powerpoint miniatures, and other handouts (300 to 400 items in all).
