Directed Theory Plate Tectonics Answers

Plate Tectonics. Plate tectonics refers to the slow movement of the earth's crustal plates. These plates were formed when earth's crust broke apart at the beginning of the global Flood. Due to unique geological conditions, these plates moved rapidly, reshaping earth's surface. This is known as Catastrophic Plate Tectonics (CPT).

Plate tectonic theory is something that could in basic terms be believed in with "faith". i believe that your question is although if "creationists that believe that the each thing replaced into formed in 6 days (as all of us understand them), and believe that the earth formed merely over six thousand years in the past, are taught to project plate tectonic theory".

Why is the theory of plate tectonics a theory? | Yahoo Answers

Plate tectonics involves the same (similar) motion of the plates as continental drift proposed, but uses what are now known plate boundaries to determine what is actually moving. Once it was understood that mid-ocean spreading centers and some continental rift zones were the mechanism behind the plate movement the theory became supportable.
