Active listening is a technique that is used in counseling, training, and solving disputes or conflicts.It requires that the listener fully concentrate, understand, respond and then remember what is being said. This is opposed to reflective listening where the listener repeats back to the speaker what they have just heard to confirm understanding of both parties.

Subversion is a free/open source version control system (VCS). That is, Subversion manages files and directories, and the changes made to them, over time. This allows you to recover older versions of your data or examine the history of how your data changed.

Version Control with Subversion

Table 1 shows the areas and the security controls identified from the ISO 27799 (prefix 7 refers to Chapter 7 of the standard, in which these concepts are detailed), along with the questions formulated to consider each security control. Security controls define what is required in terms of information security in healthcare but not how these requirements are to be met.
