The voyage is expected to take about 35 days. Final preparations are underway for a 12-meter-long ship to set sail from Canada and attempt the world's first transatlantic crossing without a crew. The USV Maxlimer, an unmanned surface vessel, is bound for the south coast of England and will conduct deep sea surveys on the way, guided by a skipper in a control station in Britain.

A metalloid is a type of chemical element which has properties in between, or that are a mixture of, those of metals and nonmetals. There is neither a standard definition of a metalloid nor complete agreement on the elements appropriately classified as such. Despite the lack of specificity, the term remains in use in the literature of chemistry.. The six commonly recognised metalloids are boron ...

Metalloid - Wikipedia

One of the most important parts of choosing a research programme is finding a supervisor who has relevant expertise in your area of interest. When you find a supervisor who, or a project that, aligns with your research interests, you should make contact with the relevant potential supervisor/lecturer/Professor or NUI Galway staff member to discuss matters further.

Find a Supervisor/PhD Project - NUI Galway

Towards this end, the article will summarize and explain six different types of neural representations of conscious qualia (), and will provide enough theoretical background and data explanations based on these representations to illustrate their explanatory and predictive power. The theory's explanations and predictions, many of them stated in this article for the first time, also shed ...
