Dates and Information: State-mandated laboratory requirement: For admission to a Regents examination in science, a student must complete the laboratory requirement (1200 minutes of hands-on laboratory, with satisfactory reports); Schools are permitted to establish a target date for the completion and submission of the laboratory requirement at any time, but no later than one week prior to the ...

The Regents - Regents Earth Science

The Friis Hills in Antarctica are dead and dry, nothing but gravel and sand and boulders. The hills sit on a flattop mountain 60 kilometers from the coast. They are blasted by cold winds that scream off the Antarctic Ice Sheet 30 kilometers farther inland. The temperature here falls to -50° Celsius during winter, and rarely climbs above -5° in summer.

THE WOODLANDS, Texas — Grains of dust from the edge of the solar system could be finding their way to Earth. And NASA may already have a handful of them, researchers report. An estimated 40,000 tons of space dust settle in Earth's atmosphere every year. The U.S. space agency has been flying balloon and aircraft missions since the 1970s to collect samples of the dust.

Some dust in Earth's atmosphere may hail from beyond ...

One of the most difficult things about operating a spacecraft around Mars (not to mention the different time zones), compared with the Earth, is that it's so far away!. Mars is so far away in fact

that it takes radio signals quite a long time to get from the spacecraft back to Earth.

An Einstein-Rosen bridge, or wormhole, is a postulated method, within the general theory of relativity, of moving from one point in space to another without crossing the space between. Wormholes are a popular feature of science fiction as they allow superluminal interstellar travel within human timescales.. A related concept in various fictional genres is the Portable hole.

Peak oil is the point in time when the maximum rate of global petroleum production is reached, after which the rate of production enters its terminal decline. If global consumption is not mitigated before the peak, an energy crisis may develop because the availability of conventional oil will drop and prices will rise, perhaps dramatically.
