An overwhelming majority of fiction is set on or features the Earth. However, authors of speculative fiction novels and writers and directors of science fiction film deal with Earth quite differently from authors of conventional fiction. Unbound from the same ties that bind authors of traditional fiction to the Earth, they can either completely ignore the Earth or use it as but one of many ...

Does the space junk orbiting Earth have any effect on the amount of solar energy reaching the surface of our planet, either by absorbing or reflecting it?

### **Last Word Archive | New Scientist**

Earth is the third planet from the Sun, and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth orbits around the Sun in 365.26 days, a period known as an Earth year.

The age of the earth has been a topic of debate among Christians over the last two centuries. Several Christian ministries promote the idea that the earth is less than 10,000 years old, which they say comes from the Bible. In reality, the Bible makes no claim as to the age of the earth, although it ...

### **How Old is the Earth According to the Bible and Science?**

The altitude of the North Star is noticeably higher in the sky at northern locations than it is at southern locations. For example, the North Star is much higher in the sky in the northern United States and Canada than it is in Florida, as anyone who pays attention on a trip, such as a vacation, can attest.
