As far as those Deitel and Deitel exercises in the book, they reuse the same ones from every programming language book that they write and just change things here and there. There is no answer book so that doesn't help much either. It's still a good book to use for learning java nonetheless. Let me know which question you're stuck on.

This book taught me Java and some good programming practices along the way. The Deitel series is very structured (focused on theory and concepts, instead of applied projects), so you might not like it if you prefer hands-on manuals.

### **Java: How to Program by Harvey Deitel - Goodreads**

I am new to Java programming, and trying to learn the language from Deitel book. I find the book is quite interesting and thorough. That is the reason I am adhering to this book. However, the exercises at the end of each chapter are quite difficult. Whether anybody has gone through the Deitel book and solved most of the exercises there?
