The mammalian nervous system executes complex behaviors controlled by specialized, precisely positioned, and interacting cell types. Here, we used RNA sequencing of half a million single cells to create a detailed census of cell types in the mouse nervous system.

Molecular Architecture of the Mouse Nervous System ...

Have you ever been told when you're stressed to stop worrying and just relax? That it's all in your head? It would be nice if it were that simple. But it's not. Physiology research shows that the stress response memory lives in your nervous system.

Stress: It's Not in Your Head, it's in Your Nervous System

The term Chakra appears to first emerge within the Vedas, the most authoritative Hindu text, though not precisely in the sense of psychic energy centers, rather as chakravartin or the king who "turns the wheel of his empire" in all directions from a center, representing his influence and power. The iconography popular in representing the Chakras, states White, trace back to the five symbols of ...

Xanax Oral : Uses, Side Effects, Interactions, Pictures ...

Hans Selye [] first popularized the concept of “stress” in the 1950s. Selye theorized that all individuals respond to all types of threatening situations in the same manner, and he called this the General Adaptation Syndrome (GAS). He claimed that, in addition to SNS arousal, other bodily systems such as the adrenal cortex and pituitary gland may be involved in a response to threat.
