a parameter In item response theory (IRT), the a parameter is a number that indicates the discrimination of a test item — how sharply the item differentiates between generally strong and generally weak test takers. If the a parameter for an item is large, the probability that the test taker will answer the item correctly increases sharply within a fairly narrow range of ability.

In public relations and communication science, publics are groups of individual people, and the public (a.k.a. the general public) is the totality of such groupings. This is a different concept to the sociological concept of the Öffentlichkeit or public sphere. The concept of a public has also been defined in political science, psychology, marketing, and advertising.
