Holy guacamole! You pack a lot of tests in each one of your tests. Can you provide a stack trace? or what do you mean by not working? edit. Extending my comment, each one of those tests should be several tests instead of one, that's probably one of the bottom reasons why you cannot find the issue.

java - AssertionError - Stack Overflow

assertEquals uses the equals method for comparison. There is a different assert, assertEquals, which uses the == operator. To understand why == shouldn't be used with strings you need to

understand what == does: it does an identity check. That is, a == b checks to see if a and b refer to the same object. It is built into the language, and its behavior cannot be changed by different classes.

string - Is Java's assertEquals method reliable? - Stack ...
