Mitochondria - Turning on the Powerhouse Mitochondria are known as the powerhouses of the cell. They are organelles that act like a digestive system which takes in nutrients, breaks them down, and creates energy rich molecules for the cell. The biochemical processes of the cell are known as cellular respiration. Many of the reactions involved in cellular respiration happen in the mitochondria.

Biology4Kids.com: Cell Structure: Mitochondria

By using two iconic mammals from Africa—the zebra and the buffalo—your students will review the functions of basic digestive organs. Then, step outside to compare these two digestive systems with a lively demonstration on the playground.
