The technology behind ONCEPT Canine Melanoma Vaccine, DNA is very complicated – but the results are very simple. Conventional vaccines (for other common diseases) stimulate an immune response directed against foreign proteins.

How ONCEPT ® Works - ONCEPT Canine Melanoma Vaccine

DNA computing is a branch of computing which uses DNA, biochemistry, and molecular biology hardware, instead of the traditional silicon-based computer technologies. Research and development in this area concerns theory, experiments, and applications of DNA computing. The term "molelectronics" has sometimes been used, but this term has already been used for an earlier technology, a then ...
