Quilting is the process of sewing two or more layers of fabric together to make a thicker padded material, usually to create a quilt or quilted garment. Typically, quilting is done with three layers: the top fabric or quilt top, batting or insulating material and backing material, but many different styles are adopted. The process of quilting uses a needle and thread to join two or more layers ...

Annual plants germinate, grow, flower, set seed and die all in one growing season. The first frost usually signals the end of the season for annuals and most need to be replanted each year. Some will set seed if the flowers are left to produce seed heads and return the following year. Keep these ...

Energy recovery ventilation (ERV) is the energy recovery process of exchanging the energy contained in normally exhausted building or space air and using it to treat (precondition) the incoming outdoor ventilation air in residential and commercial HVAC systems. During the warmer seasons, the system pre-cools and dehumidifies while humidifying and pre-heating in the cooler seasons.

### **Energy recovery ventilation - Wikipedia**

One of the first things you need if you are thinking about getting chickens is some kind of housing for them. Chicken coops can be a corner of a shed, a fancy custom built piece of art, or anything in between!
