Evolution Critical thinking questions pg 390 (Chapter 15) Natural selection is the way in which life diversifies to fill different niches and functions within what become an ecosystem. So humans are interfering with natural selection, but by causing extinctions, not by preventing them.

Evolution Critical thinking questions pg 390 (Chapter 15 ...

Critical thinking questions are a good way to monitor a student's understanding of a complex topic such as the different types of natural selection. After a student has been introduced to the concept of natural selection and given information about stabilizing selection, disruptive selection, and directional selection, a good teacher will check for understanding.

Different Types of Natural Selection - ThoughtCo

Given that it was both critical to his theory of natural selection and directly counter to much contemporary thinking, it should not be surprising that Darwin expended considerable effort in attempting to establish that variation is, in fact, ubiquitous. He also emphasized the fact that some organisms—namely relatives, especially parents and their offspring—are more similar to each other than to unrelated members of the population.

Sample answer: Humans in the city rely on resources, such as water and food, from other ecosystems. Anything that affects water, air, land, or living things can affect the city's food and water supply. Also, air in the city comes from other ecosystems. A forest fire far away can affect the air in the city.
