Philosophy of science is a sub-field of philosophy concerned with the foundations, methods, and implications of science. The central questions of this study concern what qualifies as science, the reliability of scientific theories, and the ultimate purpose of science. This discipline overlaps with metaphysics, ontology, and epistemology, for example, when it explores the relationship between ...

This paper critically engages with, and draws inspiration from the 'vertical turn' in political geographies of security. In so doing, I expose fragilities in its conceptual vocabulary and theoretical orientations, and call into question the security imaginaries on which notions of three-dimensional securitisation are predicated.
