Most circuits have more than one component, called a resistor that limits the flow of charge in the circuit. A measure of this limit on charge flow is called resistance. The simplest combinations of resistors are the series and parallel connections illustrated in . The total resistance of a combination of resistors depends on both their individual values and how they are connected.

For Wave optics, I read it from the NCERT textbook line by line and to tell you, YDSE (Young's Double Slit Experiment) is the most important thing in this chapter. If you had only one day in hand for it, YDSE, Huygens law and Brewster's angle would be the only thing you would need to do from this chapter. With this, Communication systems and Electronic Devices (Semiconductors) were only left.
