If sheet does not exist, `xlswrite` adds a new sheet at the end of the worksheet collection. If sheet is an index larger than the number of worksheets, `xlswrite` appends empty sheets until the number of worksheets in the workbook equals sheet. In either case, `xlswrite` generates a warning indicating that it has added a new worksheet.

Write the table to a file. The `writetable` function uses your system default encoding when writing files. Results may differ based on your system settings. To examine the resulting file, read the table back into the workspace by using the `readtable` function. Notice that `writetable` did not succeed in writing columns (1 and 3) containing foreign-language characters.
