This is a list of distributed computing and grid computing projects. For each project, donors volunteer computing time from personal computers to a specific cause. The donated computing power comes typically from CPUs and GPUs, but can also come from home video game systems. Each project seeks to solve a problem which is difficult or infeasible to tackle using other methods.

According to the Japanese, everyone has an ikigai. An ikigai is essentially 'a reason to get up in the morning'. A reason to enjoy life. Having spent most of the last few years helping dozens and dozens of entrepreneurs find their ikigai, whilst also searching for my own, I can now visualise where it belongs.

What is your Ikigai? · The View Inside Me

I am now a grandma of 5 from three children of my own. If I could go back I would work much harder at discovering who my children were created to be and focus on their gifts by sharpening them as opposed to conforming them into who I wanted them to be and working on them being well rounded people knowing just a little of everything and squelching their passion of life to the full by expecting ...

The history of computing hardware covers the developments from early simple devices to aid calculation to modern day computers. Before the 20th century, most calculations were done by humans. Early mechanical tools to help humans with digital calculations, like the abacus, were called "calculating machines", called by proprietary names, or referred to as calculators.
