If you take notice, Crawford has a "home experiment #5," demonstrating Feynman's "reflection from glass" (see Crawford, page 252). Where Crawford exposes the student to this effect by way of experiment, Feynman carries one further along in the abstraction. In that respect, Crawford is a bridge, a stepping-stone, a ladder, for further exploration.

When all three are present, wave phenomena always occur. Furthermore, as you will see, these principles are a great practical help both in understanding particular wave phenomena and in solving problems. I hope to convert you to a way of thinking about waves that will permanently change the way you look at the world.
