I have been meaning to provide an update on my recovery progress after suffering the vertebral artery dissection and stroke. I had another MRA (magnetic resonance angiogram) scan of my head and neck vasculature on January 30th, about eight weeks after the stroke and six weeks after beginning the anticoagulant therapy.

Recovery progress after stroke and vertebral artery dissection

Helpful, trusted answers from doctors: Dr. Shackelford on carotid artery calcification treatment: Calcification of any artery, by itself, does not warrant any type of intervention or follow up. If that calcification is associated with a stenosis ("narrowing") of the artery, then that may require follow up and/or an operation. The carotid arteries are very often calcified and if associated with ...

An aneurysm is a pathologic dilatation of a blood vessel due to weakening of the vessel's wall. The abdominal aorta is a major artery, which arises directly from the heart and supplies blood to the bottom half of your body. Abdominal aortic aneurysms are usually asymptomatic until serious complications arise.

Answers to Common Questions About Pacemakers

C5 refers to the fifth vertebra in the neck. The first vertebra is at the base of the skull, so the fifth is in the middle of the neck. Injuries to the spinal cord above this level impair the body's ability to breathe.

C5 - Answers on HealthTap

Cancelling, multiplying and dividing algebraic fractions. The last part of the previous example was a little unsystematic in its method. The systematic approach is to factor numerator and denominator, and then cancel any common factors:
