I have modified and provided answers to some of the more illuminating review questions and exercises from Hewitt's Conceptual Physics, 11th edition. I have also included 'Things to Know by Heart' at the end of the three major divisions. You should commit these rules to memory as we cover them in class.

### Conceptual Physics, 11th - Physics For Today

energy is transformed into kinetic energy and then gravitational potential energy. Yes; the popper has more gravitational potential energy when it is dropped from a greater height. This results in a greater energy transformation. The popper's source of energy is the work done to deform it and the work done to elevate it against Earth's ...
