Hundreds of practice earth science regent exam questions from old regents.

Practice Regent Exam Questions - Earth science

Welcome to WebSpectra - This site was established to provide chemistry students with a library of spectroscopy problems. Interpretation of spectra is a technique that requires practice - this site provides ¹H NMR and ¹³C NMR, DEPT, COSY and IR spectra of various compounds for students to interpret. Hopefully, these problems will provide a useful resource to better understand spectroscopy.

WebSpectra - Problems in NMR and IR Spectroscopy

Now that we're familiar with both exponential growth and decay, it's important to take a look at their graphs and notice a very hopefully obvious similarity.

How is gold made? Question Date: 2002-10-01: Answer 1: Gold is made in the interior of massive stars. When these stars end their lives, they often blow up and produce SUPERNOVA.

How is Gold Made - UCSB Science Line

The number e There exists an irrational number that is not represented with a number or a symbol (like π), but rather is represented by the letter e. If you use the e key on your calculator it will give you a decimal approximation of 2.718281828. However, this is only an approximation. Because e is an irrational number, it cannot be completely and accurately represented with a decimal.
