I get asked this question rather too often, so I'm posting my short answer here. The answer is rather more complex than it ought to be, and depends on a huge number of factors.

### **stumbler dot net**

A key and a character are not the same thing. The keyboard layout transforms between them, and that transform isn't trivial. Probably you're doing the wrong thing when using KeyDown. If you want to know which character a user entered you should use KeyPress, which gives the already translated character.. For example Keys.Decimal is a key on the numpad that corresponds to . on the US layout ...
