In accountancy, depreciation refers to two aspects of the same concept:. The decrease in value of assets (fair value depreciation); The allocation of the cost of assets to periods in which the assets are used (depreciation with the matching principle); Depreciation is a method of reallocating the cost of a tangible asset over its useful life span of it being in motion.

In accounting, book value is the value of an asset according to its balance sheet account balance. For assets, the value is based on the original cost of the asset less any depreciation, amortization or impairment costs made against the asset. Traditionally, a company's book value is its total assets minus intangible assets and liabilities. However, in practice, depending on the source of the ...
