In many cases, situation based interview questions involve problem-solving and handling difficult issues and circumstances in the workplace. You can share some details about how you anticipate you would respond to the situation, but the best answers to situational interview questions provide concrete examples of how you handled a similar situation on the job.

**Situational Interview Questions and Tips for Answering**

The primary difference between concrete and cement is that concrete is a composite material made of water, aggregate, and cement. Cement is a very fine powder made of limestone and other minerals, which absorbs water and acts as a binder to hold the concrete together. While cement is a construction material in its own right, concrete cannot be made without cement.

Timber, steel and concrete are three of the most common structural materials in the world, and each material has pros and cons. We asked industry bodies representing each to argue their case.

**Timber vs Steel vs Concrete Structures**

To squabble about the performance of binary-trees is meaningless - they are not a data structure, but a family of data structures, all with different performance characteristics. While it is true that unbalanced binary trees perform much worse than self-balancing binary trees for searching, there are many binary trees (such as binary tries) for which "balancing" has no meaning.
