In digital signal processing, spatial anti-aliasing is a technique for minimizing the distortion artifacts known as aliasing when representing a high-resolution image at a lower resolution. Anti-aliasing is used in digital photography, computer graphics, digital audio, and many other applications.. Anti-aliasing means removing signal components that have a higher frequency than is able to be ...

For example, from a wildlife perspective, we might define landscape as an area of land containing a mosaic of habitat patches, often within which a particular "focal" or "target" habitat patch is embedded (Dunning et al. 1992).

Electroencephalography (EEG) is an electrophysiological monitoring method to record electrical activity of the brain. It is typically noninvasive, with the electrodes placed along the scalp, although invasive electrodes are sometimes used, as in electrocorticography. EEG measures voltage fluctuations resulting from ionic current within the neurons of the brain.

1. Introduction. For decades, satellite remote sensing was promoted as a key data source for operational agriculture monitoring. The coarse to medium resolution optical instruments on board of SPOT-Vegetation, MODIS and PROBA-V satellites play a major role in operational near real-time crop monitoring thanks to their daily revisit cycle, their global coverage, their long-term archive and their ...

Introduction to Microscopy - Microscopes are specialized optical instruments designed to produce magnified images of specimens that are too small to be seen with the naked eye. In addition to complex designs featuring objectives and condensers, microscopes also consists of very simple single-lens instruments that are often hand-held, such as a common magnifying glass.

Evidence is now mounting that liquid-liquid phase separation (LLPS) underlies the formation of membraneless compartments in cells. This realization has motivated major efforts to delineate the function of such biomolecular condensates in normal cells and their roles in contexts ranging from development to age-related disease.
