A differential equation is a mathematical equation that relates some function with its derivatives. In  
applications, the functions usually represent physical quantities, the derivatives represent their  
rates of change, and the differential equation defines a relationship between the two.

ential equation, or just differential equation, is another type of equation where the unknown is not a  
number, but a function. We call the unknown function  $x(t)$  and think of it as a function of time  $t$ .  
Simply, a differential equation is an equation that relates the unknown function to some of its  
derivatives, which, of course, are not known ...
