Theoretical physics is a branch of physics that employs mathematical models and abstractions of physical objects and systems to rationalize, explain and predict natural phenomena. This is in contrast to experimental physics, which uses experimental tools to probe these phenomena. The advancement of science generally depends on the interplay between experimental studies and theory.

Perfection is a state, variously, of completeness, flawlessness, or supreme excellence. The term is used to designate a range of diverse, if often kindred, concepts. These have historically been addressed in a number of discrete disciplines, notably mathematics, physics, chemistry, ethics, aesthetics, ontology, and theology.

Perfection - Wikipedia

Following are some weird, strange, cool, uncool, fun, funny, bizarre, unusual, or just slightly different ideas for science fair projects. Most of these are very half-baked, so you would need to figure out how to develop a testable hypothesis and perform experiments.

The correct way to sleep in a batch file is to use the timeout command, introduced in Windows 2000.. To wait somewhere between 29 and 30 seconds:. timeout /t 30 The timeout would get interrupted if the user hits any key; however, the command also accepts the optional switch /nobreak, which effectively ignores anything the user may press, except an explicit CTRL-C:

The main difference is conceptual: while hashes are used to guarantee the integrity of data, a MAC guarantees integrity AND authentication.. This means that a hashcode is blindly generated from the message without any kind of external input: what you obtain is something that can be used to check if the message got any alteration during its travel.

What is the Difference between a Hash and MAC (Message ...
