This article covers the time period from November 1859 to April 1861. The immediate reactions to On the Origin of Species, the book in which Charles Darwin described evolution by natural selection, included international debate, though the heat of controversy was less than that over earlier works such as Vestiges of Creation. Darwin monitored the debate closely, cheering on Thomas Henry Huxley ...

Reactions to On the Origin of Species - Wikipedia

Ambivalence is a state of having simultaneous conflicting reactions, beliefs, or feelings towards some object. Stated another way, ambivalence is the experience of having an attitude towards someone or something that contains both positively and negatively valenced components. The term also refers to situations where "mixed feelings" of a more general sort are experienced, or where a person ...

Ambivalence - Wikipedia

There is a large and growing body of literature that demonstrates that contact with nature (broadly defined in the introduction and including urban green space, parks, forests, etc.) can lead to measurable psychological and physiological health benefits, as well as numerous other positive effects (). Much of the work we reviewed compared health responses in urban spaces with those observed in ...
