Mitochondria - Turning on the Powerhouse Mitochondria are known as the powerhouses of the cell. They are organelles that act like a digestive system which takes in nutrients, breaks them down, and creates energy rich molecules for the cell. The biochemical processes of the cell are known as cellular respiration. Many of the reactions involved in cellular respiration happen in the mitochondria.

Digestive Supplements for Horses The horse has a small stomach and accounts for about 10% of the horse's digestive tract. The food enters the stomach and remains there for approximately 30-45 minutes and only fills to about two-thirds ending up in the small intestine before it has been treated by the stomach's digestive juices.
