The history of hydraulic systems can be traced back to the 1646, when Braise Pascal performed the first hydrostatic experiment. He used a Pascal's barrel to investigate the effect of a force applied at one point of the fluid and how it is transmitted to the other sections within an enclosed system. The outcome of his experiments resulted in a scientific law/principle called Pascal Law or ...

Details of the rope roll which can be used to build a pyramid. The rope roll is basically a small wooden stand made with planks and a movable beam with copper bearings over which a rope can be deflected and turned around. Pairs of these rope rolls are installed on the inclined plane of the pyramid. The rope is deflected, so the haulers can walk down and pull the stone up.
