The Gödel metric is an exact solution of the Einstein field equations in which the stress-energy tensor contains two terms, the first representing the matter density of a homogeneous distribution of swirling dust particles (dust solution), and the second associated with a nonzero cosmological constant (see  $\Lambda$ -vacuum solution). It is also known as the Gödel solution or Gödel universe.

Blinn was established as Mission Institute in 1883 by the Southern German Conference of the Methodist denomination. It became coeducational in 1888 when it began admitting women. In 1889, the institute's name was changed to Blinn Memorial College in honor of the Reverend Christian Blinn of New York, who had donated a considerable sum of money to make the school possible.

Energy as a tool for mechanics problem solving. The application of the conservation of energy principle provides a powerful tool for problem solving. Newton's laws are used for the solution of many standard problems, but often there are methods using energy which are more straightforward. For example, the solution for the impact velocity of a falling object is much easier by energy methods.
